## Valfair Bridge Forum & C4C Charity Concert

In 2015, the internationally renowned Eastern Europe historian Karl Schlögel wrote in an excellent book that unfortunately received too little attention:

"With the aggression against Ukraine, the peaceful coexistence of the European states is in question. The West reacts uncertainly and hesitantly: probably also because they know very little about the history of the Ukrainian nation and about the largest area in Europe."

"We don't know how the battle for Ukraine will end; whether they stand up to Russian aggression or whether they will bow down, whether the Europeans, the West, will defend them or abandon them. Only this much is certain: Ukraine will never disappear from the map in our heads."

*(quoted from: Karl Schlögel, Entscheidung in Kiew – Ukrainische Lektionen, Carl Hanser Verlag, Munich 2015)*

Since February 24, 2022, Russia has continued the aggression that began in 2014 against Ukraine with a war of aggression, which obviously not only serves territorial conquest goals, but is also directed against Ukrainian society and its cultural identity. Probably only very few people in Germany and other western countries are familiar with it the historical development and the current state of Ukraine, with the self-image and lifestyle of the Ukrainians, with their values and with their cultural, scientific and economic achievements.

The Valfair Bridge Forum "Ukrainian Style & Values" shall therefore contribute to a better knowledge and understanding and promote connections in all areas of civil society. This charity event marks the beginning of a Silk Road of good values, which leads from the Ukraine via Poland to Germany and back.

We are convinced that Ukraine will win in the end and will thus also defend our common values! Slava Ukraini!
